Software Engineer (m/f/d)

Born out of a passion for maintenance, omis$^{4.0}$ has developed into a central tool for maintenance in all companies with complex organizational structures.

omis GmbH is one of the leading providers of maintenance management software in the German-speaking world.

Your tasks

- As part of the software development team, you are significantly involved in the creation and further development of the existing user interface and features of omis$^{4.0}$.

- The development of customer requirements for omis$^{4.0}$ will be part of your area of responsibility.

- As a specialist for omis$^{4.0}$, you will support our project management and support team in processing customer enquiries.

You…

- have completed your education (university or technical school) and have already gained professional experience in the field of software development.

- are a "native speaker" in C#, .Net, MVC, React and JavaScript.

- are experienced with SmallBusinessServer and IIS and have IT administrator skills.

- are well prepared for challenges thanks to your creativity and analytical thinking.

- are fluent in English (written and spoken) or German at level C2.

You can look forward to

| Company mobile phone and notebook | Flexible working hours | Homeoffice option | Workplace health promotion | Further training programs | Company car parking | Regular team events | Numerous benefits |
